Profile

New-graduate in Computer Science, I will happily work on your next projects as a Fullstack Developer. With Node.js and React in my toolbox, I promise you quick results and incredible performances. I am based in Paris and looking for remote opportunities.

Work Experience

Studio Async — cofounder 06/2015 — Present

Created a cashless payments company, based on NFC tags, using NodeJS as back-end, Postgres as database and Vue/Electron/Cordova as a front-end.

Better Collective — fullstack 09/2016 — 12/2017

Fullstack developer in the BettingExpert team. One of the main developer of the next BettingExpert version, using Angular and GraphQL

UTT Arena — event 12/2014 — 12/2017

Organiser of a 400-players LAN party at an exhibition center. Website, partners, manager of a 40-people team, light&sound show, streaming, etc.
